

# EverGraze Ladino Clover

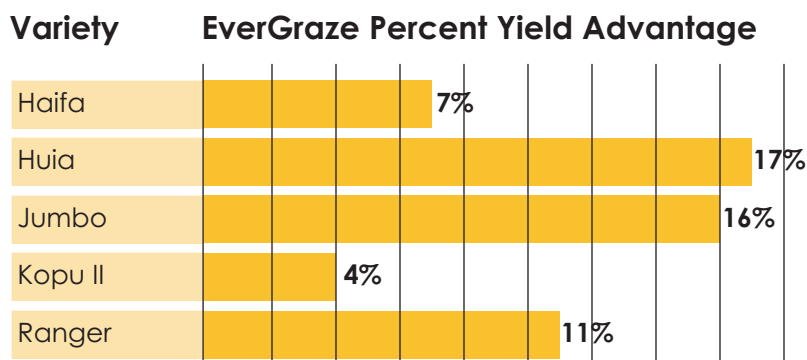

*Proven Genetic Innovation*

## Large Leaf White Clover

EverGraze is a large leaf ladino clover whose parent plants were selected for forage yield, vegetative vigor following frequent cutting, flowering intensity and freedom from leaf disease and virus. EverGraze shows strong persistence under aggressive grazing management.

### Variety Description

- Adapted to the Central, Northeastern, Southeastern, and Mid-South United States.
- Intended for use in mixtures with cool and warm season grasses for pasture renovation and as a component in wild game mixtures.
- Features a tall, showy, upright growth habit.
- Large, medium dark green leaves with many showing leaf markings.
- Medium maturity.
- Excellent choice for overseeding or interseeding into existing vegetation.
